Splash Arrestor®

Capturing sprayouts from faulty flanges carrying dangerous liquids

ADVANCE PRODUCTS & SYSTEMS, LLC

Available in 316 stainless steel

APS Splash Arrestor® is designed from a multi-layered mesh lining made of 316 Stainless Steel that provides a controlled downward disbursement of spray outs. This metal shield is resistant up to 2000°F and pressure resistant up to 3500 PSI.

- Easy and accurate installation by one person
- No maintenance required
- Reusable many times over the life of the installation
- Available for most ANSI & API flanges
- Quick, adjustable latch can be locked
- Lightweight design
